

Dr. Andrew Martin

4301 SE Nehalem St, Portland, OR 97206
 850-228-6436, anmarti2@pdx.edu
<http://web.pdx.edu/~anmarti2/index.html>

AT A GLANCE

- Hydrometeorologist, with PhD in Meteorology from Florida State University
- Community-recognized expert in Atmospheric Rivers
- 17 Peer-reviewed publications in Atmospheric Rivers, Atmospheric Dynamics, and Aerosol and Cloud Microphysics
- \$500,000 federal and state research funding awarded in 2 years as P.I.
- Teaches concepts of synoptic, dynamic and physical meteorology in *Severe Weather* at Portland State University

PROFESSIONAL PREPARATION

Postdoctoral	Scripps Institution of Oceanography Kimberly Prather and F. Martin Ralph, Advisor(s) Fields: <i>Numerical Weather Prediction, Hydrometeorology, Clouds and Aerosols</i>	2015
PhD	Florida State University <i>Meteorology</i> <u>The Impact of Anomalous Aerosol Heating on the Onset of the Asian Summer Monsoon</u> , T. N. Krishnamurti (chair), Paul Ruscher, Robert Hart, Guosheng Liu, James Tull	2012
	NASA Goddard Space Flight Center NASA Graduate Student Researchers Program, 3 yr, 10 wk / yr William K. Lau, Advisor Fields: <i>Numerical Weather Prediction, Tropical Meteorology</i>	
BS	Iowa State University <i>Physics</i>	2006

PROFESSIONAL APPOINTMENTS

Research Assistant Professor	Portland State University Department of Geography Martin Lafrenz, Chair	2019 – pres.
Assistant Project Scientist	Scripps Institution of Oceanography CASPO Division F. Martin Ralph, Supervisor	2015 - 2019

SCHOLARLY EXPERTISE AND RESEARCH EXPERIENCE

- Community-recognized expert in the physical meteorology of atmospheric rivers
 - 10 peer-reviewed articles in leading journals
 - Chapter editor for *Atmospheric Rivers*, Springer Press
 - Executive committee member and co-founder of the *International Atmospheric Rivers Conference*, first conference solely dedicated to atmospheric river science and applications
 - Faculty Instructor for the *Atmospheric Rivers Colloquium Summer School*
 - Contributed to *American Meteorology Society Glossary* entry for “Atmospheric River”
 - Local media (*KOIN* – Portland) interviews appearing as atmospheric rivers expert
- Expert in cloud and aerosol microphysics
 - 8 peer-reviewed publications in leading journals
 - 2 PhD dissertation chapters
- Expert in weather forecasting applications to water management
 - Principle Investigator for “Forecast Informed Reservoir Operations” (FIRO), using predicted conditions to enable enhanced water supply and environmental co-benefits without raising flood risk
 - 7 Invited lectures discussing FIRO adoption at new water projects
- Technical expert on regional climate downscaling
 - 2 extramurally funded projects contributing to methods in CA Climate Change Assessment
 - Expert consultant for private industry study on performance of energy efficient building designs in future climates
- Led mobile laboratory as co-investigator for NSF-funded (*AGS-145147*) intensive field study investigating clouds and aerosols in coastal environments and atmospheric rivers
 - Study generated 12 peer-reviewed publications
 - Trained 14 graduate students from 4 universities in field methods, instrumentation, and the publication process
- Managed ~\$1M /yr quasi-operational *West-WRF* numerical weather prediction effort at Scripps Institution of Oceanography
 - Supervised 10 graduate students, postdoctoral scholars and junior scientists.
 - Delivered daily forecasts seasonally 2014 - 2018, including output data, web-displayed products (<https://cw3e.ucsd.edu/west-wrf/>), and AWIPS ingest for NOAA-NWS
 - Included operational deterministic, experimental data assimilation, coupled hydrology, and ensemble modes
 - Enhanced forecast products and discussions were used by CA Flood Operations Center to respond to the Lake Oroville Dam Crisis in Feb 2017
- Graduate Student Participant, NASA Genesis and Rapid Intensification Processes (GRIP)
 - Multi-institution, multi-platform field experiment to study rapid intensification in Atlantic tropical cyclones, with locations in US and Caribbean.

- Produced daily forecasts of tropical disturbance and TC activity and gave forecast discussions during daily flight planning meeting.

TEACHING AND MENTORSHIP

- Instructor, GEOG 314U, *Severe Weather*, Portland State University, 2019 – 2020
- Instructor, *Atmospheric Rivers Colloquium Summer School*, 2019
 - Two-week intensive course oriented toward graduate student education and training in theory and applications of atmospheric rivers.
 - 30 students and 16 instructors drawn from universities and institutions across the U.S., Europe, South America, Africa and Asia.
- Graduate Teaching Assistant, MET 5403, *Meteorological Instrumentation and Observation*, Florida State University, 2008
- Thesis Committee Member, 7 students at Masters and PhD levels, including 4 complete degrees.
- Faculty mentor, PSU *Center for Climate and Aerosol Research*, NSF-REU site.
- Lectures, assignments and labs in hydrometeorology, cloud physics, synoptic meteorology, tropical meteorology, weather forecasting, weather instrumentation and water resource management.

UNIVERSITY AND PROFESSIONAL SERVICE

- Year of Water committee, Portland State University
- GIS Co-op committee, Department of Geography, Portland State University
- Promotion and Tenure ad-hoc reviewer, Scripps Institution of Oceanography
- Climate science program chair and executive committee member for the 2019 *Northwest Climate Conference*
- Convener for sessions in hydrology and atmospheric sciences, *Fall Meeting of the American Geophysical Union*
- Program committee chairman for the 2016 *International Atmospheric Rivers Conference*
- Faculty Fellow, *Institute for Sustainable Solutions, PSU-USGS University Partnership Program*
- Reviewer, *Journal of Geophysical Research, Journal of Climate, Journal of the Atmospheric Sciences, Geophysical Research Letters, Nature Scientific Reports, Environmental Science & Technology*

HONORS AND AWARDS

- NOAA Postdocs Applying Climate Expertise Fellowship (2012-2013)
- NASA Graduate Student Researchers Program Fellowship (2009-2011)
- Chi Epsilon Pi, honor society for outstanding graduate students in meteorology/atmospheric sciences (2008)
- NASA Graduate Student Summer Program Internship (2007)

GRANTS

US Army Corps of Engineers	<i>Forecast Informed Reservoir Operations</i>	\$200,000 / 2 yr. *5 yr renewal recommended
NOAA	<i>Enhancing Observations of Melting Level to Support Forecasts of Rain- Snow Partitioning in the Sierra Nevada</i>	\$86,400 / 2 yr.
CA Energy Commission	<i>Advanced Statistical-Dynamical Methods and Products for California Electrical</i>	\$99,999 / 2 yr.
CA Energy Commission	<i>Development and Evaluation of a 2- km hourly historical climate dataset for California</i>	\$106,600 / 2 yr.
