

Cathlapotle Unit N157-159 W90-92 North Profile.

- 1= A horizon soil. 2 = Hearth matrix of indurated ash and small bone fragments.
 - 3 = Undifferentiated, highly turbated pit deposits (silty loam), with high organic and artifact content.
 - 4 =' Construction Fill' of reworked pit matrix.
- Feature 253 is a pit.

Note lack of fire-cracked rock in the hearth matrix, which was kept meticulously clear of this debris.
 Elevation at excavation floor=130cmBSD.
