

PSU.ARC.280 ZAL.2003.X05

Line | Form | Space

Definition of space.

1. Define three longitudinal zones within the 18"x36" drawing from X04_[part2].

Zones are to be defined by assemblage of lines embodied in the drawing;

2. Define a thickened linear space in plan within each zone;

3. Define the 'rules' for these spaces and the junctures of their formation;

4. Delineate a section for each space, coordinate to the 'rules' of its plan.

5. Create silhouettes of both plan and section with black illustration board.

As a studio group, suspend a thick layer of chipboard in space for future exploration. [8' length x 24" wide.]
