

According to Marx what was supposed to happen:

- Cycles of boom and bust, supply and demand
- Concentration of a smaller and smaller Bourgeoisie
- Increase of a larger and larger Proletariat
- Emergence of an Organized Proletariat
The development of a Class for Itself out of a Class in Itself
(The Razing/Raising of Consciousness)
- Open Class Conflict
- Expropriation of the Expropriators (Defeat of the Bourgeoisie)
- Dictatorship of the Proletariat
- Elimination of Private Property
(the cause of conflict)
- Withering away of the State
(and the need for legitimate violence)
- Equalitarian Scientific Communism and Utopian Society!

AND WHY NOT....?
