

# Our technology turns imagination into life.

Samsung Research & Development is leading the way in inventing new technologies one could only imagine. Flexible Display technology allows compact mobile phones to have expandable displays as large as laptops. So getting real-time interactive first-aid instructions for a wild animal at a moment's notice becomes a real possibility. **You imagine, we make it real.**

SE 0219

## Flexible Display

an electronic display that can be compactly rolled up and stored when not in use (available in near future)
