Usage

```
BarChart(

        # -------------------------------------------
        # Data from which to construct the bar chart
        x=NULL, y=NULL, by=NULL, data=d,
        rows=NULL, top=NULL,

        # -------------------------------------------
        # Bar chart from aggregated data of numerical variable y
        stat=c("mean", "sum", "sd", "deviation", "min", "median", "max"),
        stat_x=c("count", "proportion"),
```
