Beer Culture

- Large brewing community in PDX
- Bars and breweries create a unique sense of place
- Offers opportunity for social interaction and leisure

Major Functions

- Organize and visualize spatial data
- Query the dataset
- Select, zoom, label, and update

A background image showing several shelves filled with various beer bottles of different shapes, sizes, and colors, creating a textured, slightly blurred backdrop for the text.

Obstacles and Imperfections

- Trouble with cursors
- Only one chance to comment
- Comments are easily over written
- User has to comment when selection is made
- Address and Zip query don't work
