PAPERS PUBLISHED IN REFEREED JOURNALS

1. Dependence among order statistics for time-transformed exponential models. *Probability in the Engineering and Informational Sciences*, **38(2)**, (2024), 387-402. doi:10.1017/S0269964823000190 (jointly with Fabio Spizzichino).

2. Kochar, S. Dependence comparisons of order statistics in the proportional hazards model. *Probability in Engineering and Information Sciences*, **37** (2023), 730-736.

3. Some new results on stochastic comparisons of coherent systems using signatures *Journal of Applied Probability* **57**, 156-173,(jointly with Ebrahim Amini-Seresht and Baha Khaledi).

4. On stochastic comparisons of largest order statistics in the scale model. *Communications in Statistics - Theory and Methods*, **44**, (2015), 4132-4143. (jointly with Nuria Torrado).

5. Stochastic comparisons of weighted sums of arrangement increasing random variables. *Statistics and Probability Letters*, **102** (2015), 42-50. (jointly with Xiaoqing Pan and Min Yuan).

6. Stochastic order relations among parallel systems from Weibull distributions. *Journal of Applied Probability*, **52**(2015), 102-116 (jointly withNuria Torrado).

7. Reminiscences of the early developments of some partial orders. *Journal of Indian Statistical Association* **52**(2014), 65-79.

8. On the skewness of order statistics with applications. *Annals of Operations Research*, **212** (2014), 127-138 (jointly with Maochao Xu).

9. Excess wealth transform with applications. *Springer Lectire Notes in Statistics : Stochastic Orders in Reliability and Risk Management In Honor of Professor Moshe Shaked*(2013), 273-288, eds H.Li and X. Li (jointly with Maochao, Xu).

10. A review on convolutions of Gamma random variables. *Springer Lectire Notes in Statistics Stochastic Orders in Reliability and Risk Management In Honor of Professor Moshe Shaked* (2013), 199-217,eds H.Li and X. Li (jointly with B. Khaledi).

11. Dependence among order statistics - a review and some recent results. *Journal of Indian Statistical Association* **51**(2013), 113-135 (jointly with Maochao, Xu).

12. Some new applications of PP plots. *Probability in Engineering and Information Sciences 27* (2013), 353-366 (jointly with Isha Dewan).(http://journals.cambridge.org/$repo\_$A89wu9K6)

13. Stochastic comparisons of order statistics and spacings - a review. *ISRN Probability and Statistics* **2012** (2012), Article ID 839473, 47 pages. (http://archives.pdx.edu/ds/psu/9110)

14. Some unified results on comparing linear combinations of independent gamma random variables. *Probability in Engineering and Information Sciences* , **26** (2012), 393-404 (jointly with Maochao Xu).

15. On the skewness of order statistics in the multiple-outlier models. *Journal of Applied Probability* **48** (2011), 271-284 (jointly with Maochao Xu).

16. Stochastic comparisons of spacings from heterogeneous samples. Martin Wells and Ashis Sengupta edited *Festschrift Volume for Sreenivasa Rao Jammalamadaka* (2011), pp 113-129, Springer (jointly with Maochao Xu).

17. The tail behavior of the convolutions of Gamma random variables. *Journal of Statistical Planning and Inference* **141** (2011), 418-428 (jointly with Maochao Xu).

18. Stochastic Comparisons of Order statistics in the scale model. *Journal of Statistical Planning and Inference* **141** (2011), 276-286 (jointly with Khaledi, B and Farsinezhad, S.).

19. On residual lifetimes of k-out-of-n systems with nonidentical components. *Probability in Engineering and Information Sciences* **24** (2010), 109-127 (jointly with Maochao Xu).

20. On the right spread order of convolutions of heterogeneous exponential random variables. *Journal of Multivariate Analysis* **101** (2010), 165-176 (jointly with Maochao Xu).

21. Comparisons of parallel systems according to convex transform order. *Journal of Applied Probability*, **46** (2009), 342-352 (jointly with Maochao Xu).

22. On the range of heterogeneous samples. *Journal of Multivariate Analysis* **100** (2009), 1587-1592. (jointly with C. Genest, and Maochao Xu).

23. Connections between some concepts in Reliability and Economics. *Modeling, Computation and Optimization* (2008), 44-55, eds S. K. Neogy, A. K. Das and R. B. Bapat. ISI Platinum Jubilee Series on Statistical Science and Interdisciplinary Research. Publisher: World Scientific Volume (jointly with Maochao Xu).

24. A New Dependence Ordering with Applications. *Journal of Multivariate Analysis* **99** (2008), 2172-2184 (jointly with Maochao Xu).

25. Order restricted inference for comparing the cumulative incidence of a competing risk over several populations. *Beyond Parametrics in Interdisciplinary Research : Festschrift in Honor of Professor Pranab K. Sen.* **IMS Collections 1** (2008), 50-61 (jointly with Hammou El-Barmi and Hari Mukerjee).

26. On the dependence between the extreme order statistics in the proportional hazards model. *Journal of Multivariate Analysis* **99** (2008), 777-786 (jointly with Ali Dolati and Christian Genest).

27. Some recent results on stochastic comparisons and dependence among order statistics in the case of PHR model. *JIRSS* **6** (2007), 125-140. (jointly with Maochao Xu).

28. Excess Wealth Order and Sample Spacings. *Statistical Methodolgy* **4** (2007), 385-292.(jointly with Xiahou Li and Maochao Xu).

29. Stochastic comparisons of parallel systems when components have proportional hazard rates. *Probability in Engineering and Information Sciences*, **21** (2007), 597-609 (jointly with Maochao Xu).

30. Stochastic orderings of order statistics of independent random variables with different scale parameters. *Communications in Statistics- Theory & Methods* **36** (2007), 1441-1449 (jointly with B. Khaledi).

31. Book review of *Stochastic Orders* by Moshe Shaked and G. Shanthikumar, Springer (2007). *Biometrics* **63** (2007), 629.

32. Stochastic and Dependence Properties of Generalized Order Statistics. *Recent Developments in Ordered Random Variables* (2007), 139-154, eds. Ahsanullah and M.Z. Raqab. Nova Publishers, New York (jointly with B. Khaldei).

33. Smooth Estimation of Uniformly Stochastically Ordered Survival Functions. *Journal of Combinatorics, Information and System Sciences* **31** (2006), 1-13 (jointly with Y. Chaubey).

34. Lorenz Ordering of Order Statistics. *Statistics and Probability Letters.* **76** (2006), 1855-60.

35. Likelihood Ratio Tests For and Against Ordering of the Cumulative Incidence Functions in Multiple Competing Risks and Discrete Mark Variable Models. *J. Statist.Plan. Inf.* **136** (2006), 1588-1607 (jointly with Hammou El Barmi and John Tsimikas).

36. Weibull Distribution: Some Stochastic Comparisons Results. *J. Statist.Plan. Inf.* **136**(2006), 3121-3129 (jointly with B. Khaledi).

37. Dispersive Ordering - Some Applications and Examples. *Statistical Papers* **47** (2006), 227-247 (jointly with Jongwoo Jeon and C. G. Park).

38. Dependence, Dispersiveness and Multivariate Hazard Rate Ordering. *Probability in Engineering and Information Sciences* **19** (2005), 427-446 (jointly with B. Khaledi).

39. Dependence Orderings for Generalized Order Statistics. *Statistics and Probability Letters* **73** (2005), 357-367 (jointly with B. Khaledi).

40. On the dependence structure of order statistics. *Journal of Multivariate Analysis*, **95**(2005),159-171. (jointly with Jean Averous and Christian Genest).

41. Ordering convolutions of gamma random variables. *Sankhya* **66**(2004), 466-473, (jointly with B. Khaledi).

42. Estimation of Cumulative Incidence Functions in Competing Risks Studies Under an Order Restriction. *J. Statist.Plan. Inf.* **118**(2004), 145-165, (jointly with Hammou El-Barmi, Hari Mukerjee and F. Samaniego).

43. Stochastic Orderings among Order Statistics and Sample Spacings. *Uncertainty and Optimality— probability, statistics and operations research* (2002), 167-203, edited by J.C. Misra. World Scientific Publications, Singapore (jointly with B.Khaledi).

44. Inference for sub-survival functions under order restrictions. *Journal of the Indian Statistical Association* **40** (2002), 85-103, (jointly with Hammou El-Barmi).

45. The Total Time on Test Transform and the Excess Wealth Stochastic Orders of Distributions. *Advances in Applied Probability* **34** (2002), 826-845. (jointly with Xiahou Li and Moshe Shaked)

46. Some bivariate notions of IFR and DMRL and related properties. *Journal of Applied Probability* **39** (2002), 533-544. (jointly with Bruno Bassan and Fabio Spizzichino).

47. Estimation of two ordered mean residual life functions. *J. Statist.Plan. Inf.* **107** (2002), 321-341 (jointly with X. Hu, Hari Mukerjee and F. Samaniego).

48. Generalized supremum tests for the equality of cause specific hazard rates. *Lifetime Data Analysis* **8** (2002), 277-288 (jointly with Eddy Lam and Paul Yip).

49. Dispersive ordering among linear combinations of uniform random variables. *J. Statist.Plan. Inf.* **100** (2002), 13-21 (jointly with B. Khaledi).

50. On random sampling without replacement from a finite population. *Ann. Inst. Statist. Math.* **53** (2001), 631-646 (jointly with Ramesh Korwar).

51. Dependence properties of multivariate mixture distributions and their applications. *Ann. Inst. Statist. Math.* **53** (2001), 620-630 (jointly with B. Khaledi).

52. Stochastic properties of spacings in a single outlier exponential model. *Probability in Engineering and Information Sciences* **15** (2001), 401-408 (jointly with B. Khaledi).

53. Some new results involving the NBU(2) class of life distributions. *J. Appl. Probab.***38** (2001), 242-247 (jointly with X. Li).

54. Smooth estimators of stochastically ordered survival functions. *Journal of the Indian Statistical Association* **38** (2000), 209-235 (jointly with Y.P. Chaubey).

55. Sample range-some stochastic comparisons results. *Calcutta Statistical Association Bulletin* **50** (2000), 283-291 (jointly with B. Khaledi).

56. Estimation of a monotone mean residual life. *Annals of Statistics* **27** (2000), 905-921 (jointly with Hari Mukerjee and F. Samaniego).

57. Dependence among spacings. *Probability in Engineering and Information Sciences* **14** (2000), 461-472 (jointly with B. Khaledi).

58. Some new results on stochastic comparisons of parallel systems. *J. Appl. Probab.* **37**(2000), 1123-1128 (jointly with B. Khaledi).

59. Stochastic comparisons and dependence among concomitants of order statistics. *J. Mult. Anal.* **73** (2000), 262- 281. (joitly with B. Khaledi).

60. On dispersive ordering between order statistics in one-sample and two-sample problems. *Stats. Prob. Letters* **46** (2000), 257-261 (jointly with B. Khaledi).

61. Comparing sub-survival functions in a competing risks model. *Lifetime Data Analysis*, **6**(2000), 85- 97 (jointly with K. C. Carriere).

62. Stochastic orderings between distributions and their sample spacings - II. *Stats. & Prob. Letters*, **44** (1999), 161-166 (jointly with B. Khaledi).

63. The 'signature' of a coherent system and its application to comparisons among systems. *Naval Research Logistic*, **46**(1999), 507-523 (jointly with Hari Mukerjee and F. Samaniego).

64. Dispersive ordering of convolutions of exponential random variables. *Stats. & Prob. Letters*, **43** (1999), 321-324 (jointly with C. Ma).

65. On stochastic orderings between distributions and their sample spacings. *Stats. & Prob. Letters*, **42** (1999),

66. Restricted tests for testing independence of time to failure and cause of failure in a competing risks model. *Canadian J. Statist..* **26**(1998), 57-68. (jointly with R. Dykstra and T. Robertson).

67. Stochastic comparisons of spacings and order statistics. *Frontiers in Reliability*. World Scientific : Singapore (1998). 201-216. eds., Basu, A. P., Basu, S. K. and Mukhopadhyay, S.

68. Partial ordering of distributions based on right- spread functions. *J. Appl. Probab.* **35** (1998), 221- 228 (jointly with Fernandez-Ponce and Muñoz-Perez).

69. Stochastic comparisons of parallel systems of heterogeneous exponential components. *J. Stat. Plan. Inf.* **65**(1997), 203-212 (jointly with Richard Dykstra and Javier Rojo).

70. Inference about the transition-point in a NBUE- NWUE model. *Sankhya Ser A* **59** (1997), 117- 132. (jointly with D.L. Hawkins).

71. Connections among various variability orderings. *Stats. & Prob. Letters* **35** (1997), 327-333. (jointly with K. C. Carriere).

72. Stochastic properties of order statistics from finite populations. *Sankhya Ser A* **59** (1997), 102-116. (jointly with Ramesh Korwar).

73. Change point tests based on U- statistics with applications in reliability. *Metrika* **45** (1997), 259-269. (jointly with E.E. Aly).

74. A positive dependence paradox and aging distributions. *J. Ind. Statist. Assoc.* **34**(1996), 105-112. (jointly with Kumar Joag-dev).

75. Some new results on stochastic comparisons of spacings from heterogeneous exponential distributions. *J. Mult. Anal.* **59** (1996), 272-281. (jointly with Javier Rojo).

76. A note on dispersive ordering of record values. *Calcutta Statistical Association Bulletin* **46** (1996), 63-67.

77. Testing whether one risk progresses faster than the other in a competing risk problem. *Statistics and Decisions* **14** (1996), 209- 222. (jointly with R. Dykstra and T. Robertson).

78. Some results on interarrival times of nonhomogeneous Poisson processes. *Prob. Engg. Inf. Sci..* **10** (1996), 75-85.

79. Stochastic orders for spacings of heterogeneous exponential random variables. *J.Mult. Anal.* **57** (1996), 69-83. (jointly with R. Korwar)

80. Dispersive ordering of order statistics. *Stats. & Prob. Letters* **27** (1996), 271-274.

81. Bivariate dependence properties of order statistics. *J. Mult. Anal.* **56** (1996), 75-89. (jointly with P.J. Boland, M. Hollander and K. Joag-dev).

82. A review of some distribution-free tests for the equality of cause specific hazard rates. *Analysis of Censored Data* - the IMS - LNMS **27**(1995), 147-162, eds. J. V. Deshpandé and Hira Koul.

83. Likelihood ratio tests for symmetry against one- sided alternatives. *Ann. Inst. Statist.Math.* **47** (1995), 719-730. (jointly with R. Dykstra and T. Robertson).

84. Inference for likelihood ratio ordering in two probability distributions. *J.Amer. Statist. Assoc.* **90** (1995), 1034-1040 (jointly with R. Dykstra and T. Robertson).

85. Some new results on normalized spacings from restricted families of distributions. *Journal of Statistical Planning and Inference* **47** (1996), 47-57. (jointly with S. Kirmani).

86. Likelihood ratio tests for bivariate symmetry against ordered alternatives. *Stats. & Prob. Letters* **22** (1995), 167-173 (jointly with Hammou El Barmi).

87. Likelihood based inference for cause specific hazard rates under order restrictions. *J. Mult. Anal.* **54** (1995), 263-274. (jointly with R. Dykstra and T. Robertson).

88. A general composition theorem and its applications to certain partial orderings of distributions. *Stats.& Prob. Letters* **22** (1995), 111- 119 (jointly with Frank Proschan and Kumar Joagdev).

89. A cusum test for symmetry against positive biasedness. *Calcutta Statistical Association Bulletin* **44** (1994), 157-163 (jointly with E. E. Aly).

90. Some tests for comparing cumulative incidence functions and cause specific hazard rates.*J. Amer. Statist. Assoc.* **89** (1994), 994-999 (jointly with E.A.A. Aly and Ian McKeague).

91. Monotonicity properties of the ordered ranks in the two sample problem. *Stats. & Prob. Letters* **20** (1994), 63-67.

92. On testing for independence against right tail increasing. *Metrika* **41** (1994), 211-225 (jointly with E. E. Aly).

93. On likelihood ratio ordering of order statistics. *Linear Algebra and Its Applications* **199** (1994), 281-291 (jointly with R.B. Bapat).

94. Characterizations of identically distributed independent random variables using order statistics. *Stats. & Prob. Letters* **17** (1993), 225- 230. (jointly with R.B. Bapat).

95. On hazard rate ordering of dependent variables. *Adv Appl. Prob.* **25** (1993), 477-482. (jointly with E.E. Aly).

96. Testing exponentiality against IDMRL distributions with unknown change point. *Ann. Statist* **20** (1992), 280-290 (jointly with D.L. Hawkins and Clive Loader).

97. A note on characterization of symmetry about a point and on the triples test. *The Statistician* **41** (1992), 161-163.

98. Rank order probabilities for the two sample dispersion problem. *Stats. & Prob. Letters* **13** (1992), 203-208 (jointly with George Woodworth).

99. On the Triples test for symmetry. *Stats. & Prob. Letters* **14** (1992), 311-312.

100. Inference for the crossing point of two continuous c.d.f.'s. *Ann. Statist.* **19** (1991), 1626-1638 (jointly with D.L. Hawkins).

101. Statistical inference for uniform stochastic ordering in several populations. *Ann. Statist.* **19** (1991), 870-888 (jointly with R. Dykstra and T. Robertson).

102. Independence of time and cause of failure in the dependent competing risks models. *Statistica Sinica* **1** (1991), 295-299 (jointly with Frank Proschan).

103. On preservation of some partial orderings under shock models *Adv.Appl. Prob.* **22** (1990), 508-509.

104. Some partial ordering results on record values. *Commun.Statist.- Theor. Meth.* **19** (1990), 299-306.

105. Distribution-free tests based on sub- sample extrema for testing against positive dependence. *Aust. J. Statist.* **32** (1990), 45-52 (jointly with R.P.Gupta).

106. Testing whether F is more IFR than G. *Metrika* **37** (1990), 45-58 (jointly with I. A. Ahmad). and Life Span Amer. (Book review)

107. Distribution-free tests for the stochastic ordering alternatives under the competing risk model. *Biometrika* **76** (1989), 775-81 (jointly with Isha Bagai and J. V. Deshpandé).

108. Some distribution-free tests for testing homogeneity of location parameters against ordered alternatives. *J. Indian Stat. Assoc.* **27** (1989),1-8 (jointly with Amita).

109. On extensions of DMRL and related partial orderings of life distributions.*Stochastic Models* **5** (1989), 235-46.

110. Testing for superaddivity of the mean value function of a non-homogeneous Poisson process. *Commun. Statist. Theor. -Meth.* **18** (1989), 1549-62 (jointly with T. Ramallingam).

111. Testing for dispersive ordering. *Stats. & Prob. Letters* **7** (1988), 179-185 (jointly with I.A.Ahmad).

112. A distribution-free test for the equality of two failure rates in the presence of competing risks. *Commun. Statist. Theor. - Meth.***18** (1989), 107-120 (jointly with Isha Bagai and J.V.Deshpandé).

113. Nonparametric tests for independence in bivariate reliability models. *Proceedings of the International Conference on Advances in Multivariate Statistical Analysis* (1988), 203-217, edited by J. K. Ghosh and S. DasGupta, (jointly with J.V.Deshpandé)

114. A Monte-Carlo study of some tests for testing exponentiality against positing aging. *Commun. Statist. -Simula.* **17** (1988), 803-811 (jointly with R. P. Gupta).

115. Some results on weighted distributions for positive-valued random variables. *Prob. Eng. Inf. Sci.* **1** (1987), 417-423 (jointly with R.P. Gupta).

116. Partial orderings of life distributions with respect to their aging properties. *Naval Research Logistic* **34** (1987), 823-829 (jointly with D. Weins).

117. Competitors of the Kendall-Tau test for testing independence against positive quadrant dependence. *Biometrika* **74** (1987), 664-66 (jointly with R.P. Gupta).

118. Dispersive ordering and superadditive ordering. *Adv. Appl. Prob.* **18** (1986), 1019-22 (jointly with Alzaid, Ahmed and Bartoszewicz).

119. Testing for star-equivalence of two probability distributions. *J. Indian Statist. Assoc.* **24** (1986), 21-30 (jointly with Kalpana Kusum and J.V. Deshpandé).

120. Aspects of positive aging. *J. Appl. Prob.* **23** (1986), 748-58 (jointly with J.V. Deshpandé and H. Singh).

121. A class of distribution-free tests for testing homogeneity of scale against ordered alternatives. *Advances in Order Restricted Statistical Inference* (1986), 169-183, edited by Richard Dykstra, Tim Robertson and Tim Wright, Springer-Verlag, (jointly with R.P. Gupta).

122. A test for exponentiality against HNBUE alternative. *Commun. Statist. Theor. Meth.* **15** (1986), 2295-2304 (jointly with H. Singh).

123. On tail-ordering and comparison of failures rates. *Commun. Statist. Theor. Meth.* **15** (1986), 1377-1388 (jointly with Isha Bagai).

124. Some competitors of Mood's test for the two- sample scale problem. *Commun, Statist. Theor. Meth.* **15** (1986), 231-239 (jointly with R.P. Gupta).

125. A new class of tests for testing exponentiality against positive aging. *J. Indian Statist. Assoc.* **23** (1985), 89-96 (jointly with J.V. Deshpandé).

126. On exponential scores statistic for testing against positive aging. *Stat.& Prob. Letters* **3** (1985), 71- 73 (jointly with J.V. Deshpandé).

127. Testing exponentility against monotone failure rate average. *Commun. Statist. Theor. Meth.* **14** (1985), 381-392.

128. Testing goodness of fit in terms of the failure rate function. *IAPQR Transactions* **9** (1984), 1-6.

129. Dispersive ordering is the same as tail ordering. *Adv. Appl. Prob.* **15** (1983), 686-87 (jointly with J.V.Deshpandé).

130. A test for exponentiality against IFR alternatives. *IAPQR Transactions* **8** (1983), 1-8 (jointly with J.V.Deshpandé).

131. A linear combination of two U- statistics for testing new better than used. *Commun. Statist.* **12** (1983), 153-160 (jointly with J.V.Deshpandé).

132. Some competitors of the Wilcoxon-Mann- Whitney test for the location alternative. *J. Indian Statist. Assoc.***20**(1982), 9-18 (jointly with J. V. Deshpandé).

133. A new distribution-free test for the equality of two failure rates. *Biometrika* **68** (1981), 423-426.

134. Some competitors of the tests based on powers of ranks for the two sample problem. *Sankhya Ser. B* **42** (1980), 236-41 (jointly with J. V. Deshpandé).

135. Distribution-free comparison of two probability distributions with reference to their hazard rates. *Biometrika* **66** (1979), 437-41.

136. A class of distribution-free tests for the two sample slippage problem. *Commun. Statist. Theor. Meth.* **A7** (1978), 1243-52.

137. A class of distribution-free tests for the two sample location- scale problem. *Bulletin of the International Statistical Institute* **47** (1977), 288-291.
