

**Spring 2016 School of the Environment Seminar Series**  
Held jointly with USGS OR Water Science Center and Oregon State University

**Tuesdays from 12-1 PM**  
**Cramer Hall Room 53**

- March 29            **David Schmale**    (Virginia Tech)  
*Drone-ing for microbes along highways in the sky*
- April 5             **Andy Goodwin**    (US Army R&D Center)  
*Accounting for Animal Movement Decisions in the Design and Management of Civil Infrastructure*
- April 12            **Amy East**            (USGS Santa Cruz)  
*Drivers of channel change on four Olympic National Park Rivers, 1939-2013*
- April 19            **Paul Hsieh**        (USGS Menlo Park)  
*The Science Behind the Taming of the Deepwater Horizon Oil Spill*
- April 26            **Allen Hunt**        (Wright State)  
*TBA*
- May 3               **Steve Ingebritsen** (USGS Menlo Park)  
*Hydrothermal monitoring in the Cascade Range*
- May 10             **Ty Ferre**            (Darcy Lecturer, University of Arizona)  
*Seeing Things Differently: Rethinking the Relationship between Data, Models, and Decision Making*
- May 17             **Joanne Emerson** (Ohio State University)  
*Microbial influences on the carbon cycle: Examples from subsurface and permafrost-associated ecosystems*
- May 24             **Cliff Voss**         (Birdsall-Dreiss Lecturer, USGS Menlo Park)  
*Density-Driven Groundwater Flow: Seawater Intrusion, Natural Convection, and Other Phenomena*
